Checkbox

I confirm that I have read and understood the information provided above.

I want to choose this type of project:

Social Practice & Service Project

Choose Project Title

【DKU 合伙人(DKU Partner)】【Individual Application】 Students become PEER partners to support green education projects and manage volunteer systems for social innovation education in county areas.

Name

Xuqi Chi

NetID

xc259

Class

2029

Major

Behavioral Science

Why are you interested in this project/field/industry?

Since my father's hometown is a small village in the northern-east part of China, I get to know some peers who may possess the talent, but didn't finish their school and choose another worse life direction because of the poor education quality and cognitive limitation. That is where my initial passion for education equity comes from. When I came to DKU, I entered DKU Youngsters Engagement Club. During my visit to a county-level high school, I get to know more about their growth environment and the challenges they are facing. So I consider this project as a good opportunity to learn more about the current situation of county-level education in China and see if there is more I can do to improve it. Also since we will build our own volunteer system and conduct activities in this project, I want to enhance my leadership skills and implement them to conduct more meaningful programmes in DKU Youngsters Engagement Club in the future.

Describe the experience and skills that make you a good community leader.

Firstly, I have experiences related to county education. I am a member of DKU Youngsters Engagement Club which focuses on education equity, and I participated in the collaboration with

Honghui Miles Project. Last November, I visited to The First High School of Yuanling County, Huaihua City in person, conducting a sharing presentation themed how to bridge the gap between ourselves and the goals for Gaokao with my partner. I also had home visit and two-on-one communication with the students, showing that I have strong communication skills. Additionally, I was responsible for writing CSCC mid-term report of this project. Secondly, I have voluntary experiences pf Beijing Mulan game theatre and BUY 42 one-day manager which require communication and organization skills.

(For long-term projects) Describe your plan for sustaining the long-term development of this project.

Firstly, since the main project is conducted in county-level, I want to ensure a regular basis in-person visit which will contribute to stronger connection with county-level schools. To achieve continuous progress, I want to firstly build strong connection with other team members. There will be online groupchat and offline meetings to foster a sense of belonging and shared mission. Also, I will design a plan with clear time line at the beginning of the project to ensure the ongoing operation of the project. There will be reflection after every activity to make timely adjustment. Those experiences will contribute a lot to explore the replicability of the project. When it turns to the collaboration with project leader, I will firstly clarify the way and frequency of communication like weekly brief report and monthly online meeting. It is also important to distirbute different missions. Shared working tools like google doc will be used efficiently. If there is leader transition, he or she needs to be familiar with our previous work and is supported by all the project members.
